Creatium Lab

WEBSITES AND DIGITAL MARKETING FOR SMALL BUSINESSES

A website that sells. Marketing that brings customers.

Your whole digital engine – in one working system.

creatiumlab.com info@creatiumlab.com +359 895 457 247

THE PROBLEM

Why do fragmented digital services waste resources?

SCENARIO A

You have a website but no marketing infrastructure

You have a presentable digital shop window that stays completely invisible to the market. There are no analytics, Google does not index it properly, and potential customers leave without making an enquiry.

SCENARIO B

You invest in marketing, but the website stops the sales

You send paid traffic and resources to a platform that loads slowly, has no properly configured tracking (Google Analytics 4, Bing Webmaster Tools) and breaks the user journey.

THE SOLUTION

One system for digital growth

We combine the technical build, high speed and security with precise analytics, email automation, brand content and optimisation for Google and AI search engines. Technology provides stability; marketing provides growth.

The components of your digital engine

01
Development and design
the web foundation

02
Analytics and SEO
visibility and discoverability

03
Email marketing
retention and sales

04
Monitoring and security
support

THE WEB PLATFORM

Technology infrastructure

- **Speed and security**
  Modern web architecture, built for mobile devices and protected against outages.
- **Commerce integrations**
  Modern payment methods (Stripe, myPOS, Apple Pay, Google Pay) and easy sign-in.
- **24/7 monitoring and support**
  Ongoing technical care and system updates so your processes never stop.
- **Hosting, domain and business email**
  We set up and look after your hosting, domain and email addresses on your domain, so everything runs in one place.
- **Easy content management**
  An admin panel where you change prices, texts and photos yourself, without waiting for anyone.

THE GROWTH

Marketing, analytics and positioning

- **Google Analytics & metrics**
  Business analytics that track every traffic source and conversion.
- **GEO, SEO & AI optimisation (AIO)**
  Structuring your data so your brand is the first choice both in Google Maps and in AI assistants (ChatGPT, Gemini and others).
- **Automated email marketing**
  Automated communication sequences that retain and convert your users.
- **Brand content and expert blogs**
  Targeted texts that build authority in your niche and put your business ahead of the competition.

WHO WE WORK WITH

We don't work with every business.

We help most where a business does good work but looks weaker online than it really is. If you recognise yourself here, we will get along.

We are not the right fit if you:

- want the cheapest website made in a day
- want a promise of first place in Google or ChatGPT
- have no time for one conversation about your business

01 Local businesses with a good reputation

Salons, garages, clinics, restaurants and repair companies that customers praise but Google barely shows.

02 Businesses that want inquiries

Your website should bring calls and orders, not just exist.

03 Owners who want to see the numbers

We show where customers come from and what works, so you decide with data.

04 Small online shops

That want to sell more to the people who already visit, instead of paying more and more for ads.

HOW WE WORK

A managed, structured path from concept to market launch

01

Strategic analysis

A deep dive into the business model, the target audience and the competitive positioning.

02

Architecture and marketing plan

Designing the website structure, the marketing funnels and the analytics points in parallel.

03

Demo and approval

Reviewing an interactive prototype and approving the concept before the technical build.

04

Development and integration

Coding the platform, configuring security and setting up analytics, SEO parameters and email platforms.

05

Technical tests and launch

Checking system stability, mobile compatibility and integrations before the official launch.

06

Regular support and growth

Daily care for technical health and steady scaling of your marketing presence.

PACKAGES

Three packages with clear prices.

Starter Engine

A modern website, a secure technical base and your first customers online.

€450 website build

€150 / month support, security and basic marketing

Most popular

Active Marketing & Growth

For a business ready to grow: marketing, content, automation and online sales.

€850 first month: website and marketing launch

€400 / month active marketing and support

Custom Marketing Scale

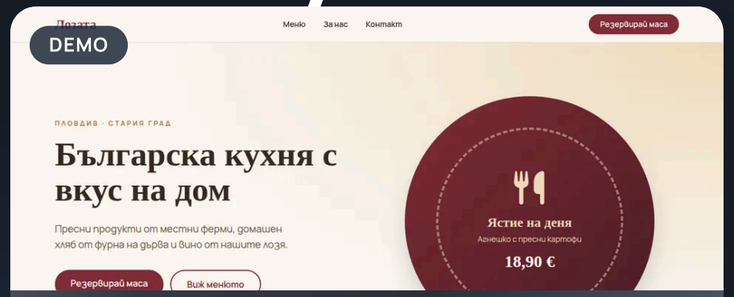

For companies with specific processes, integrations (CRM, ERP) and large-scale marketing.

A custom quote and a subscription based on scale

INDUSTRIES

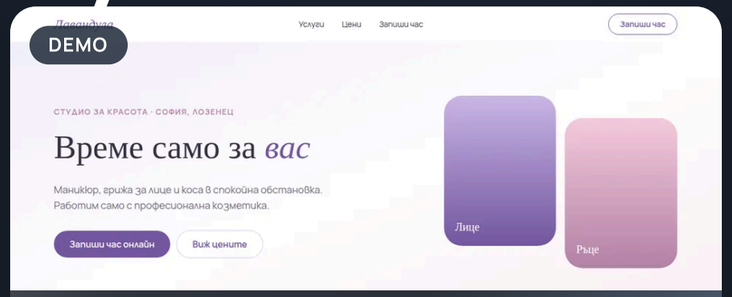

We have thought about your industry.

We built demo websites for businesses we want to work with. Each one solves the real problems of its industry. The businesses are fictional, the solutions are real.

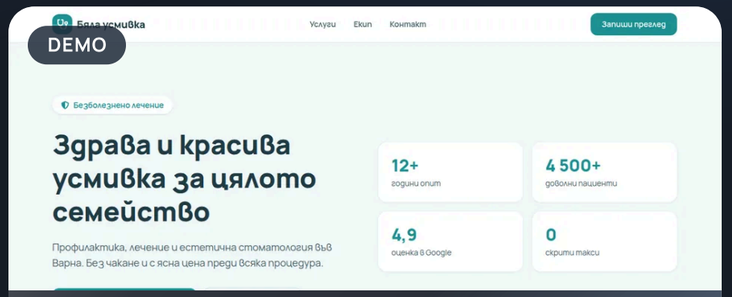

RESTAURANT

Lozata Restaurant

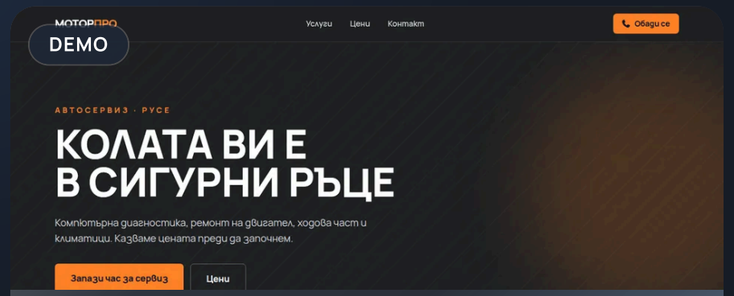

BEAUTY SALON

Lavandula Studio

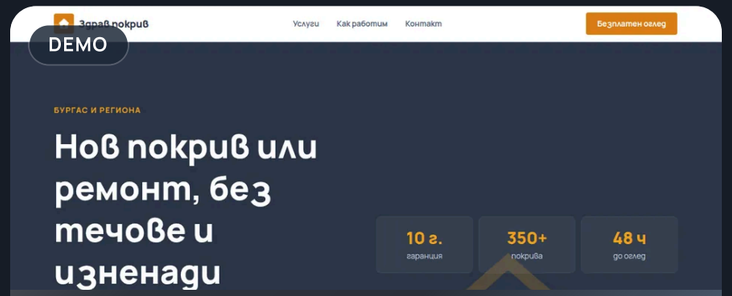

DENTAL CLINIC

Byala Usmivka Dental Centre

CAR REPAIR SHOP

Motor Pro Car Service

CONSTRUCTION AND ROOFING

Zdrav Pokriv

ONLINE SHOP

Medena Pita

HOW WE THINK

One system instead of five contractors.

01

Customer first, decoration second

Every page leads to one action: a call, an inquiry or a purchase. The design serves that.

02

We measure, we don't guess

Every website starts with Google Analytics and Search Console. You see where inquiries come from.

03

No middlemen

You work directly with the people who build your website and marketing. Your questions don't go through account managers.

04

Everything is in your name

The domain, profiles and access are yours from day one. If you ever leave, you take everything.
